Profile

Innovative and Productive front-end developer. I call myself as a interactive developer because I like interacting with people through code.I've been improving myself on front-end development,I'm self taught developer and front-end is my passion that makes me feel like i have to keep improving my skills every single day.And love modern designs and i follow innovations/new trends.

About me

I'm a self-taught frontend developer with passion for design, and devoted to building quality websites and apps. On a personal level, I am highly motivated, result oriented, hard-working, fast learner and constantly seeking to improve my skills and am fully aware of the latest Front-end Development Tools. My passion and curiosity for modern websites pushed me to discover and explore Web development which naturally, led to my great interest in front-end web development. Currently, I develop my personal web site and at the same time improving my ability in the field of Front-end development.
